Laboratory

Water/Wastewater Titration System

The HI 901 is ideal for automatically measuring critical parameters in water such as pH, Alkalinity, Acidity, Chloride and much more. *Call for more details and additional parameters.*

ITEM #	RETAIL	MUNICIPAL
HI 901	\$6500	\$5900

pH, mV and Ammonia Meter Kit

This kit provides lab professionals a package that includes the HANNA HI4222 pH/mV/ISE meter and an Ammonia ISE and standards. This kit offers great value and a meter that can measure both parameters simultaneously.

ITEM #	RETAIL	MUNICIPAL
HI 4222	\$1949	\$1600

Wastewater Laboratory Photometer

This comprehensive lab meter can measure up to 36 parameters such as COD, Ammonia, Nitrates, Nitrites, DO, Phosphates and more. Reagents are sold separately.

ITEM #	RETAIL	MUNICIPAL
HI 83099	\$1010	\$949

Portable Meters

Multi-parameter Portable Meter

The HANNA portable multiparameter meter measures 12 critical parameters with one probe. Parameters include pH, ORP, DO, Conductivity, TDS, temperature and more. The unit is available with or without GPS.

ITEM #	RETAIL	MUNICIPAL
HI 9828-4	\$2250	\$1975

DO/BOD Portable Meter

HI 98186 dissolved oxygen meter has an extended range to 50 ppm and 600% saturation. Includes barometric pressure measurement and calibration with a user selectable unit (mmHg, inHg, atm, mbar, psi, kPa) and salinity, pressure and temperature compensation. Other features include measurement of BOD, OUR and SOUR.

ITEM #	RETAIL	MUNICIPAL
HI 98186	\$949	\$849

pH/mV/ORP Temperature Meter

The HANNA HI9125 one of the most reliable and easy to use portable pH meters available. The meter comes with rechargeable batteries, large LCD, and pH and temp electrodes. ORP electrode is sold separately.

ITEM #	RETAIL	MUNICIPAL
HI 9125	\$379	\$349

Water Treatment Products

Process/In-line

Process Chlorine & pH Analyzer

This in-line analyzer allows for the simultaneous monitoring of both pH and chlorine. The analyzer has two 4-20 mA outputs so both parameters can be configured with most SCADA systems. The analyzer follows the EPA's recommended DPD 330.5 method for Chlorine determination. By combining pH and Chlorine, the analyzer reduces cost, wall space and the need to maintain two separate controllers.

ITEM #	RETAIL	MUNICIPAL
PCA 320	\$2529	\$2399

Advanced pH/ORP Controller

The advanced HANNA pH controller allows for continuous pH monitoring with the ability to work with most SCADA systems, injector pumps, or alarms. The controller can come with one or two pH set points and has our exclusive sensor check technology which provides continuous inspection of probe status.
